

Comments received by the Participants

...The symposium was great...Thanks for a well run Symposium...I enjoyed both the program and the social events... This meeting was really one of my most beautiful conferences ... Thank you for preparing the GREAT Symposium... The Symposium has been certainly an important contribution to the scientific advancement in radon field and to the international exchanges...Thank you for allowing us to visit Greece and to participate in a great event ... It was an excellent Conference... Thank you for your outstanding organisation ... Thank you for an excellent Conference ... Thank you for the perfect organisation of NRE-VII, you have reached a very high level of quality ...NREVII was a very successful meeting ...The facilities and hospitality provided were excellent ... I know that you have had to work extremely hard to ensure that NRE-VII went ahead ... With the current difficulties in funding I suspect that we are going to see smaller conferences which target niche interests rather than large all encompassing events. Whilst such events will be useful there is a risk that the attendees may become insular and unaware of the work of others which will be a shame... Once again please accept my heartiest congratulations...Thanks for everything you and the NTUA team did to make NRE-VII such an outstanding success... Thanks again for the probably best organised Conference I have attended... Καταπληκτική διοργάνωση, ευχαριστούμε για ό,τι κάνατε για μας (marvelous organisations, thanks for what you have done for us) ...
