# ERRICCA-2

## Work Package N° W1

- Objectives: To establish a European Radon Website
- Description of the work: Develop a European Radon Website, initially containing ERRICCA 2 Website including the following sub-sections:
  - Public Awareness
  - Materials
  - Newbuild
  - Mitigation
  - Mapping
  - Measurement

## The new Website aims to:

- Provide a communication forum for ERRICCA-II participants.
- Establish an information source for all participants, the Industry, National and EU authorities and the public, regarding Radon.
- The dissemination of information, results and conclusions of the National and International fora held in the frame of the project.

We must pay attention to **ERRICCA-2**  
build the European radon  
Website to be:

- User-friendly
- Easy-to-use
- With links to the most important radon  
www-sites all-over the world

## WWW Site Address

**<http://radon.nuclear.ntua.gr>**

# End User Groups

ERRICCA-2

- ERRICCA-2 participants
- National Researchers' Groups (with ERRICCA-2 participants acting as contact points)
- National Industrial partners' Groups (with ERRICCA-2 participants acting as contact points)
- EU authorities
- National Authorities
- The public

## Regarding the construction, two options are available:

- A simply programmed Site, with appearance like ERRICCA-1 Web Site, with less graphical load, Netscape and MS Explorer compatible **or**
- A more advanced Site, with appearance like NRE-VII Web Site, with full graphical load, mainly MS Explorer compatible.

## One site with two parallel platforms has been designed

- free public access for some topics
- password protected topics for ERRICCA-2 participants

## A Website deontology Committee is necessary to:

- have the responsibility for the information published in the Website
- make the interconnection between the Webmaster and ERRICCA-2 forum
- assure the EU and National Authorities that this is an officially recognized Website.

## We propose the following membership for the Committee

- **Chris Scivyer**, BRE, ERRICCA-2 Coordinator
- **Emiel van der Graaf**, Nuclear Geophysics Division/RUG and
- **Evangelos P. Hinis**, Web-Master, NTUA

## We need from you ...

- Suggestions about the topics needed
- Information to be published
- Useful National, EU and worldwide links for our "Useful Radon-connected links"

**The European radon Website  
will be published until the**

**20<sup>th</sup> of March 2002**
